

OUR ENERGY POLICY

Haydarpasha Palace aims to implement and develop a proactive energy management system based on sustainable development. By adopting the Sustainable Development Goals, Haydarpasha Palace complies with national and international legislation and regulations, and carries out its activities by providing the necessary resources within an Energy Management System based on continuous improvement. It strives to reduce energy consumption and costs and increase its long-term environmental and economic sustainability.

In this direction;

- To work in compliance with the ISO 50001:2018 Energy Management System standard within the scope of our Integrated Management System and to ensure the continuity of the system,
- Ensure the efficient use of energy and natural resources in all our activities,
- Implement environmentally and energy friendly technologies when procuring equipment for new projects or existing processes,
- To save energy and reduce the consumption of natural resources by making efficiency-enhancing improvements in existing processes and systems,
- Continuous improvement of energy performance through the design and supply of energy efficient products, processes and services,
- Considering continuous improvement while setting goals and targets in energy performance and management,
- To continuously measure and improve energy performance in order to increase sustainable energy efficiency and effectiveness,
- Ensure that adequate resources (knowledge, expertise and economic resources) are provided and continuously reviewed to achieve energy-related goals and objectives,

- Ensuring compliance with legal and other requirements related to energy efficiency, use and consumption,
- Ensure that the share of renewable energy sources is maintained and increased,
- It is committed to raising the awareness of all its stakeholders on renewable energy, energy efficiency and the negative impacts of climate change, and to continuously improve its EnYS and energy performance by developing energy efficiency projects that will support the principle of sustainable development.
